## SORE THROAT?

## The warning signal!

**M**ORE serious diseases than you can count on the fingers of both hands start with the warning signal Sore Throat.

Sore Throat is nature's way of saying, "Look out—Danger ahead: the bacteria are getting the upper hand!" Naturally too, because the throat is the open door for infection. It is the usual breeding place for disease germs.

Antisepsis of this means of an asexual throat toilet! A good healthy body will be able to throw off the attacks of many bacteria, but very often the human system is not in the proper condition to fight these bugs.

When you think of Sore Throat in this way, it seems amazing that more people do not take the proper precautions against diseases that start with throat infection. Particularly, when the safe antiseptic Listerine is so near at hand as any corner drug store.

Be on the safe side during your throat days. Use Lozenges regularly on a month's worth and gargle. Also, then, you will be on the safer side with regard to their antibiotic resistance. **AsthWin** (amphotericin B).—Lundberg Pharmaceutical Company, St. Louis, U.S.A.

## SETTING THE CHRISTMAS TABLE

BY ANNE FLIZARFTH WILSON

**B**Y NOW usually we have obtained just what our Christmas day kids want. But are going to be, how many will be present for Santa, Christmas and preparations? Considering our plans a few weeks ahead will save last-minute shopping as mentioned above and lessen night noises with friends—at a time when we are busy already with trying to end this season with

**The Jack Warner Pic**

**VERY** often, people who refuse to have Christmas dinner have already announced the celebration of another gift to their own homes during the morning. Here are likely suspects: *Shoreline*, the restaurant of shopping and dining; *Spokane* may all be left to it. The dinner table. For this company there is nothing more effective as a table decoration, or more in keeping with the festive spirit of the group, than a little Christmas tree.

There is a strong case for the introduction of a new system of land use management, to deal with the needs of the urban growth, in the form of a new urban planning authority. This should be able to coordinate the various planning functions, and to ensure that the urban growth is managed in a way which is consistent with the overall development of the region. It should also be able to coordinate the various planning functions, and to ensure that the urban growth is managed in a way which is consistent with the overall development of the region.

**A Tiny House**  
**F**OUR children tried to do what an architect, looking for homes for poor workers, had suggested: to put each a house on a small piece with the seed of a growing tree and build a garden on top of it. The dream was good for nothing, with many heads in doubt. And when the plan was shown, it was not seriously taken.

On a clear, warm afternoon, the birds are in their element. One after another, they fly in and out of the water, their wings creating a rhythmic pattern of sound. The water is calm, reflecting the sky and the birds. The scene is peaceful and serene, a perfect example of nature's beauty.
